• Available for Projects

100M+	500M+	2B+	99.9%
Daily Auth Requests	Users Served	Records Migrated	Uptime Delivered

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with **8+ years** of experience architecting and delivering highly scalable, distributed backend systems handling **100M+ daily requests** and serving **500M+ users**. Deep expertise in **Node.js, TypeScript, and microservices**, combined with a strong command of enterprise Identity & Access Management (IDAM), data engineering, and DevOps. Proven ability to lead zero-downtime migrations of **2B+ records** and sustain **99.9% uptime** across mission-critical production systems at Reliance Jio — one of the world's largest telecom ecosystems. Adept at translating complex technical challenges into pragmatic, high-impact solutions.

CORE COMPETENCIES

- ▶ Scalable Distributed Systems Architecture
- ▶ Identity & Access Management (IDAM / SSO)
- ▶ Data Engineering, Migration & Reconciliation
- ▶ Microservices & RESTful API Design
- ▶ High-Availability & Fault-Tolerant Design
- ▶ Performance Tuning & Observability
- ▶ CI/CD Pipeline Automation
- ▶ Real-Time Monitoring & Alerting
- ▶ Cloud Infrastructure Management (Azure)
- ▶ Full Stack Web Application Development

TECHNICAL SKILLS

Languages & Runtimes	Node.js, TypeScript, JavaScript, Java, Shell Scripting
Backend Frameworks	Express.js, GraphQL, REST APIs, Spring Boot
Frontend	React.js, Next.js, Tailwind CSS, Redux, Zustand, Framer Motion
Databases	Apache Cassandra, PostgreSQL, MySQL, Oracle Identity Directory (OID)
Data & Analytics	ClickHouse, DuckDB, Metabase, Data Migration, Data Reconciliation
Caching & Messaging	Redis, RabbitMQ, Hazelcast, Socket.io, Message Queues
Identity & Auth	LDAP, OAuth 2.0, SSO, SAML, JWT, OTP Auth, OID/OIM
DevOps & Cloud	Docker, Kubernetes, Azure, Jenkins, Bamboo, NGINX, PM2
Monitoring & Logging	ELK Stack, Prometheus, Grafana, OpenTelemetry, JMeter

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer Reliance Jio (Reliance Industries Limited) India — Remote 500M+ Subscribers Ecosystem	November 2016 – Present 8+ Years
Identity & Access Management (IDAM)	2016 – Present
- Designed and maintained centralized IDAM platform providing single-identity, one-time authentication for JioTV, JioSaavn, and Hotstar channels - Engineered authentication APIs sustaining 100M+ daily requests with 99.9% uptime - Implemented LDAP, OTP-based auth, and multi-channel identity federation for enterprise scale - Architected JAAM failover system ensuring continuous agent authentication availability	
JioID — Universal Identity Platform	2019 – Present
- Led backend development of universal SSO solution integrating sign-up, login, and account management across all Jio products for 100M+ users - Built RESTful APIs with Node.js and Cassandra achieving sub-100ms latency at peak 100M+ daily request load - Delivered 360° customer identity view supporting social logins and multi-device single sign-on	

UIFP — Unified Identity & Fingerprinting

2021 – Present

- Architected Global Unique ID system unifying identities across all RIL subsidiaries for cross-domain user identification
- Led data analysis and correction for **500M+ user records**, coordinating team of data analysts with zero data loss

Data Migration & Reconciliation

Ongoing

- Led end-to-end data migration across all identity platforms, processing and validating **2B+ records** with zero data loss
- Built reconciliation pipelines using DuckDB, ClickHouse, and Metabase; reduced data discrepancy rate to near zero

JioMoney — Payment Platform

2019 – 2020

- Built secure digital payment identity services with Oracle Identity Directory (OID) for low-latency user auth
- Delivered high-availability NoSQL data storage handling **1M+ transactions/day** across physical and digital channels

Monitoring UI & Automation Dashboard

2017 – 2018

- Built real-time React + Node.js process monitoring dashboard, reducing incident response time by **60%**
- Developed JMeter-integrated Automation Dashboard executing **1,000+ automated tests/day** as scheduled CI/CD jobs

Inventory Management System & Trial WiFi / JTL IDAM APIs

2016 – 2019

- Built React + MySQL inventory application with RBAC to centrally manage **500+ servers**
- Developed Wi-Fi Identity Management APIs (OTP) and IoT authentication platform for **10,000+ connected devices**

KEY PROJECTS

1. JioID — Universal Identity Platform

2019 – Present

Stack: Node.js • Cassandra • Redis • REST APIs • SSO | Impact: 100M+ Users

 - One-global-identity solution for sign-up, login, and account management across all Jio products
 - Universal SSO with social logins and 360° customer view; sub-100ms API response at 100M+ daily requests
2. IDAM — Identity Access Management

2016 – Present

Stack: Node.js • Cassandra • RabbitMQ • LDAP • Java | Impact: 100M+ Daily Requests

 - Centralized authentication backbone for JioTV, JioSaavn, Hotstar — 99.9% uptime at 100M+ daily auth requests
3. UIFP — Unified Identity & Fingerprinting

2021 – Present

Stack: Node.js • Cassandra • ClickHouse • Data Migration | Impact: 500M+ Users

 - Global Unique ID system unifying identities across all RIL subsidiaries; 500M+ user records corrected with zero data loss
4. Data Migration & Reconciliation Engine

Ongoing

Stack: DuckDB • ClickHouse • Metabase • Node.js | Impact: 2B+ Records

 - Processed 2B+ records across identity platforms; led analyst team to near-zero data discrepancy rate
5. MindfulQalb — Mental Wellness Platform

2026 | mindfulqalb.com

Stack: React • Next.js • Tailwind CSS • Node.js • Vercel | Live Web App

 - Designed and deployed full-stack mindfulness platform with journaling, community, and spiritual practice features

PROFESSIONAL RECOGNITION

- Alisha Patel, DevOps — Jio Platforms:** "The Monitoring UI dashboard Nouman built has transformed how we manage Node.js processes. Centralized control reduced our incident response time by 60%."
- Sharique Ansari, Engineering Manager — Reliance Digital:** "Nouman built the universal SSO solution that seamlessly integrates across all Jio services. His expertise in Node.js and Cassandra is outstanding."
- Sanjog Shine, Senior Architect — Jio:** "Nouman led the migration of 2B+ records flawlessly. His systematic approach with ClickHouse and DuckDB ensured zero data loss. Highly recommended!"

ATS KEYWORDS

Node.js • TypeScript • Identity & Access Management (IDAM) • Single Sign-On (SSO) • OAuth 2.0 • SAML • LDAP • Microservices • Distributed Systems • Apache Cassandra • ClickHouse • DuckDB • Data Migration • Data Reconciliation • REST API • GraphQL • Docker • Kubernetes • Azure • CI/CD • ELK Stack • Prometheus • Grafana • OpenTelemetry • JMeter • Redis • RabbitMQ • React.js • Next.js • Full Stack Development • Backend Engineering • Performance Tuning • High Availability • Enterprise Architecture

EDUCATION

Details available on request.

PROFESSIONAL SUMMARY VARIATIONS

- Variation 1 — Scale & Systems (Senior Backend / Platform Roles)

Senior Full Stack Developer with 8+ years building enterprise-grade distributed systems at internet scale. At Reliance Jio, engineered identity and authentication platforms handling 100M+ daily requests and serving 500M+ users with 99.9% uptime. Expert in Node.js, TypeScript, Cassandra, and microservices, with deep specialization in IDAM, SSO, OAuth 2.0, and large-scale data migration (2B+ records).
- Variation 2 — Leadership & Impact (Staff Engineer / Lead / Architect Roles)

Accomplished Senior Software Engineer and technical leader with 8+ years driving large-scale platform engineering at Reliance Jio. Led architecture and delivery of JioID, UIFP, and enterprise IDAM solutions serving 500M+ users at 100M+ daily requests. Proven track record leading data engineering teams through 2B+ record migrations with zero data loss.
- Variation 3 — Full Stack / Freelance (Consulting or Startup Roles)

Versatile Senior Full Stack Developer and systems architect with 8+ years building production-ready, scalable web applications and backend services. Core expertise in Node.js APIs, React/Next.js frontends, IDAM, data engineering, and DevOps. Independently built live digital products including a full-stack mental wellness platform. Available for remote freelance engagements worldwide.
